Professional Summary

Results-driven **Healthcare IT Implementation & Functional Testing Specialist** with **4+ years of experience** in Healthcare SaaS and HIS/HIMS implementation, User Acceptance Testing (UAT), functional validation, issue analysis, client onboarding, go-live support, and cross-functional collaboration. Currently managing end-to-end HIMS implementation and deployment at Healthray Technologies; previously validated and supported software deployments across **500+ hospital clients**. Strong analytical, troubleshooting, documentation, user training and stakeholder management skills.

Core Competencies

HIS/HIMS Implementation	Go-Live Support	User Training & Onboarding
Functional Testing	User Acceptance Testing (UAT)	Defect Tracking
Workflow Validation	Root Cause Analysis	Escalation Management
Requirement Analysis	Test Documentation	Stakeholder Management

Professional Experience

HIMS Implementation Specialist **Aug 2026 – Present**

Healthray Technologies Pvt. Ltd. — Healthray HIMS *Delhi NCR*

- Manage **end-to-end implementation and deployment** of Healthray HIMS across healthcare facilities.
- Coordinate with hospital management, doctors, front-desk executives, nursing staff, pharmacists, laboratory teams and accounts departments to ensure smooth software adoption.
- Conduct **module-wise training** and provide functional and technical support for OPD, IPD, Nursing, Pharmacy, Laboratory, OT, Billing, Accounts, Store and MRD modules.
- Lead hospital **go-live activities**, onsite implementation, user onboarding and post-deployment support.
- Identify operational gaps, analyse user requirements, troubleshoot workflow issues and coordinate with internal product and development teams for resolution.
- Support process optimization, workflow standardization and improved operational efficiency through effective HIMS utilization.
- Manage client queries, escalations, implementation progress and stakeholder communication to ensure customer satisfaction and successful project delivery.

Customer Support & Operations Manager **Jul 2025 – Apr 2026**

Timestream Technologies Pvt. Ltd. — Healthcare SaaS / HIS Platform (500+ Hospital Clients) *Delhi NCR*

- Collaborated with hospital stakeholders to analyze business requirements and validate software functionality during implementation and post-deployment support.
- Performed functional validation and issue investigation for HIS modules including OPD, IPD, Billing, Pharmacy and Laboratory workflows.
- Validated functional behavior of integrated HIS modules and coordinated with development teams to verify successful data flow across interconnected workflows.
- Investigated production issues, reproduced defects, documented findings and coordinated timely resolutions with Product, Development and QA teams.
- Prepared implementation documents, issue reports and functional validation records, supporting software quality improvements throughout deployment.
- Executed functional test cases, validated business workflows and verified application fixes prior to production deployment.
- Provided go-live support and verified successful deployment of application updates across **500+ hospital clients**.
- Conducted User Acceptance Testing (UAT), validated configuration changes and ensured production readiness while maintaining high customer satisfaction.

Technical Support & QA Operations Lead **Jan 2024 – Jul 2025**

Timestream Technologies Pvt. Ltd. — Healthcare SaaS / HIS Platform *Delhi NCR*

- Led Functional Testing and UAT for the **Version 3.0 HIS rollout** across 500+ hospital clients, achieving **zero critical production failures** after deployment.
- Executed workflow validation and business requirement validation for newly developed HIS features before production release.
- Documented defects, reproduced customer-reported issues, verified fixes and coordinated with Development and QA teams throughout the software lifecycle.
- Prepared UAT documentation, test scenarios, implementation reports and functional validation documents supporting successful software releases.

- Collaborated with Implementation Consultants, QA Engineers, Product Managers and Developers during end-to-end software implementation and deployment.
- Performed system validation and functional verification before production deployment, ensuring software quality and business continuity.

Operations & Frontend Support Manager **Jan 2023 – Dec 2023**
Urbanite Creation *Delhi NCR*

- Delivered technical and operational support for client-facing digital products, troubleshooting website and UX issues and communicating solutions clearly to non-technical stakeholders.
- Managed vendor and client communications, ensuring timely resolution of service requests and maintaining high satisfaction levels.
- Used data-driven insights to optimize workflows and improve delivery efficiency across the team.

Technical Skills & Tools

Testing	Functional Testing, Integration Testing (Functional Validation), UAT, Workflow Validation, Test Case Execution, Defect Tracking, Root Cause Analysis, System Validation
Healthcare IT	HIS/HMS/HIMS Implementation, Go-Live Support, User Training, Business Workflow Analysis, Requirement Validation, Hospital Workflow Management
Technical	SQL, Python, HTML, CSS, JavaScript (Basic), API Validation (Functional Understanding), System Integration (Functional Exposure)
Documentation	Test Documentation, Test Scenarios, Requirement Documentation, Process Mapping, Issue Reporting
Tools	Microsoft Excel, Google Workspace, CRM & Ticketing Systems

Key Implementation Projects

- **HIS Version 3.0 Enterprise Rollout:** Performed Functional Testing, UAT, workflow validation, defect verification, issue investigation and go-live support for a large-scale Healthcare SaaS implementation serving 500+ hospitals.
- **Hospital Workflow Validation:** Validated OPD, IPD, Billing, Pharmacy and Laboratory workflows, executed functional test cases, verified business requirements and coordinated with Development and QA teams before production deployment.

Education

Bachelor of Arts – Political Science
Indira Gandhi National Open University (IGNOU) *Delhi, India*

Certifications

- Data Science Foundations — Great Learning
- UI/UX for Beginners — Great Learning
- Diploma in Computer Applications (DCA)

Key Achievements

- **Zero-Failure Rollout:** Led Functional Testing, UAT, workflow validation and the Version 3.0 rollout across 500+ healthcare clients with zero critical production failures after deployment.
- **All India NFLAT Scholarship (2019):** Recognized nationally for academic excellence.
- **Zonal Gold & Bronze Medalist in Athletics:** Demonstrates discipline, focus and commitment to high performance.
