PRODUCT OPERATIONS & TECHNICAL DELIVERY LEADER | HEALTHCARE SAAS

Product-oriented Operations Leader with 4+ years of experience optimizing enterprise SaaS delivery across 500+ hospitals nationwide. Proven impact in reducing ticket resolution time by 80–90%, cutting backlog by 75%+, and accelerating implementation cycles by 1 week through structured prioritization, workflow redesign, and sprint collaboration.

Experienced in translating recurring user pain points into actionable product inputs and driving measurable operational efficiency improvements.

Core Competencies

- Product Operations • Sprint Prioritization • Feature Requirement Structuring
- Workflow Optimization • KPI & SLA Ownership • SaaS Implementation
- Enterprise Stakeholder Management • QA & UAT Leadership
- Cross-Functional Coordination • Process Improvement • Team Leadership (10+)

Professional Experience

Timestream Technologies Pvt. Ltd.

Jan 2024 – Present

Manager – Operations & Product Coordination

July 2025 – Present

- Lead a 10-member cross-functional team managing SaaS operations for 500+ hospitals across India.
- Reduced ticket resolution time by 80–90% and backlog volume by 75%+ through structured prioritization frameworks.
- Improved average handling time to 15–25 minutes by redesigning workflow escalation processes.
- Accelerated new hospital go-live cycles by 1 week through optimized onboarding coordination.
- Identified high-frequency workflow gaps contributing to recurring tickets and influenced sprint prioritization to reduce repeat issue volume.
- Act as strategic liaison between enterprise clients (Pristyn Care, HCAH Vitus Care, Sahayog) and engineering teams, balancing scalability with client impact.
- Track performance KPIs including ticket frequency trends, resolution time patterns, and escalation ratios to guide improvement initiatives.

QA & Operations Lead

Jan 2024 – July 2025

- Led end-to-end testing and cross-team coordination for NuvertOS HIMS Version 3.0 release.
- Identified system loopholes, usability gaps, and edge cases prior to production deployment.
- Independently managed enterprise ticketing system serving 500+ hospitals for 15 months.
- Structured onboarding and UAT feedback loops to improve feature adoption and implementation quality.
- Strengthened client relationships, generating new business opportunities through solution-driven engagement.

Urbanite Creation

Jan 2023 – Dec 2023

Frontend Developer & Operations Manager

- Delivered and optimized business websites improving user experience and conversion performance.
- Executed data-driven marketing initiatives increasing campaign ROI.
- Led recruitment, vendor negotiations, and financial reporting initiatives.
- Streamlined operational workflows to improve project delivery efficiency.

- Managed institutional budgeting and operational planning.
- Delivered technical training and digital literacy programs.
